

Frequently-Asked-Questions TRANSPORTATION ON PALLET

PALLET DETAILS:

A wooden 4-way pallet of 100 cm wide and 120 cm long.

Single-stacked pallet

- If loaded into a 20' FCL, there will be some space left between the top of pallets and the container ceiling.
- Recommended for combining with other light foodstuff.
- Some loose cases may also be put on top of pallets to reach for the maximum gross weight limit.
- If 20 pallets of this are loaded into a 40' FCL, the total gross weight will be close to the load limit of the 40'FCL

SINGLE-STACKED	Cases per layer	Layers per pallet	Pallets per 20'FCL floor surface	Approx. gr.wt. of pallet	Approx. height of pallet
24/330ml	10	12	10	1,170 kgs	162.5 cm
24/350ml	10	12	10	1,230 kgs	172.5 cm
24/400ml	16	6	10	1,134 kgs	157.5 cm
12/330ml	19	12	10	1,113 kgs	162.5 cm
12/350ml	19	12	10	1,170 kgs	172.5 cm
12/400ml	16	12	10	1,134 kgs	157.5 cm

Double-stacked pallet

- Modified for maximum space management when loaded into a 20' FCL

DOUBLE-STACKED	Cases per layer	Layers per pallet	Pallets per 20'FCL floor surface	Approx. gr.wt. of pallet	Approx. height of pallet
24/330ml	10	8	20	790 kgs	112.5 cm
24/350ml	10	7	20	730 kgs	107.5 cm
24/400ml	16	4	20	766 kgs	112.5 cm
12/330ml	19	8	20	752 kgs	112.5 cm
12/350ml	19	7	20	695 kgs	107.5 cm
12/400ml	16	8	20	766 kgs	112.5 cm
